Subject: Bridge Advertisement (DSI 24-052) Freeboard for Weathering Steel Bridges
Date: Monday, December 16, 2024 11:07:50 AM

The [EPG](#) has been updated as described below:

Implementation Statement: Effective immediately for design process not started.

(The Implementation Statement is a recommendation by the Development Section. The SPM is responsible for the level of implementation for any particular job.)

Revision Date	Items Revised	Description of Change
Dec. 2024	EPG: 751.1.2.9.2	Changed the freeboard restriction guidance for a weathering steel superstructure. The guidance was measuring the freeboard from a normal water surface elevation which was not tied to a design flood, so enforcement is up to interpretation. The new guidance measures the freeboard from ordinary high water which is subjective but well defined.
